

Although this comment is past the June 4th deadline, I urge you to consider my point of view. As a pilot who travels around the country, I thoroughly enjoy the XM Radio product. Not only do I listen to the music, but the traffic and weather information is extremely useful and quick. I urge the FCC to reject the NAB's petition 04-160 because in our country, we should have choice. I should have a right to listen to commercial free XM radio and pay a fee on my own. I should have a right to choice, and XM radio should have the freedom to provide this service, just as local cable stations provide instant traffic and weather for a fee. It's about time we have a great product such as XM radio and all they have to offer.
